Portfolio

Professional Summary

Python Developer with experience in building automation solutions and processing structured data in large-scale workflows. Skilled in handling XML, JSON, and document-based data, implementing validation, transformation, and error-handling logic. Developed Python-based automation scripts to improve processing efficiency and system reliability. Also built backend applications using Django and Django REST Framework, working with REST APIs and databases.

Technical Skills

Backend Development:	Python, Django, Django REST Framework, REST APIs, Django ORM
Data Handling:	JSON, XML, HTML, Data Validation, Transformation Logic, File Handling
Databases:	MySQL, SQLite
Automation & Scripting:	Python Scripting, Error Handling, Debugging
Tools & Deployment:	Git, GitHub, Postman, Render, Streamlit
Frontend:	HTML, CSS, JavaScript, Bootstrap

Projects

Investment Analytics Platform – Django REST Framework, MySQL, Streamlit 2026

- Built a full-stack investment tracking application using Django REST Framework, supporting portfolio management, transaction tracking, and watchlist features.
- Integrated JWT-based authentication (SimpleJWT) for secure user access and protected APIs.
- Designed modular service-layer logic for portfolio calculations and transaction processing.
- Processed real-time stock data using Yahoo Finance API (yfinance) with caching for performance optimization.
- Developed APIs and a Streamlit dashboard to visualize portfolio analytics (investment, value, profit/loss).

FitHub – Fitness Tracking Platform (Django) 2025

- Created a fitness tracking web application using Django with server-rendered templates (HTML, CSS, Bootstrap).
- Implemented authentication, session management, and form validation for secure user data handling.
- Designed relational models using Django ORM to manage BMI records, workouts, and user recommendations.
- Developed logic for BMI calculation and dynamic exercise recommendations.

Experience

Python Developer – Automation **July 2024 – Present**
Chennai Publishing Services Private Limited *Chennai, India*

- Developed Python-based automation scripts to process structured data (XML, JSON, HTML) for large-scale workflows.
- Designed data parsing and transformation logic to handle complex content structures and ensure consistency.
- Implemented automated validation checks to detect character limit violations before delivery, improving data quality and reducing client-side errors.
- Automated repetitive data preparation tasks using Python scripts, reducing manual processing time from 30–45 minutes to under 5 minute per file.
- Built reusable and modular components for content extraction, transformation, and automation workflows.
- Optimized processing performance by reducing manual effort and improving execution efficiency.
- Collaborated with cross-functional teams to analyze requirements and deliver reliable automation solutions.

Education

Master of Computer Applications (MCA) Apr 2024 – Present
Anna University, Chennai
CGPA: 8.3

Bachelor of Computer Applications (BCA) Jun 2021 – Apr 2024
Ramakrishna Mission Vivekananda College, Chennai
CGPA: 7.6

Certifications & Achievements

- Python and Django Full Stack Web Developer Bootcamp — Udemy
- SQL for Beginners — Scaler
- The Complete JavaScript Course — Udemy
- Performance of the Month Award (2×) — Recognized for improving automation workflows and reducing manual effort
